Information on Medical Colleagues of AMCOIL-1 in Cuba

Action: FBI

1. In late December 1966 and early January 1967 GUSHER-1 debriefed AMCOIL-1 in detail regarding his medical colleagues still in Cuba. AMCOIL-1 said that most of them would like to leave Cuba. The majority of those described below are psychiatrists who are keenly aware of, and depressed by, the effect of the Castro regime. Almost all of the psychiatrists mentioned herein have friends and patients among Cuban Government officials and, in AMCOIL-1's opinion, those defecting would cooperate in extensive debriefings of their considerable knowledge.
- Most of them frequently travel abroad. AMCOIL-1 is attempting to maintain correspondence with the most prominent. The defection of any of the psychiatrists would be especially harmful to the present Cuban Government, since it is faced with a rapid increase of suicides, mental illnesses, and alcoholism, stemming from a general breakdown of morals and mental health as traditional values are uprooted and replaced by repressive, unfamiliar demands.

2. In the descriptions that follow, it should be noted that the Department of Psychiatry of the University of Havana Medical School is composed of professors and instructors from the psychiatric staffs of several hospitals, where the classes actually are given; there is no University Hospital per se.

9/13/29	V.B.	Assistant Professor of Psychiatry at [redacted] Hospital.
Dec 6, 1928	J.S.	Intelligent and professionally qualified. Admitted he is a candidate for the Cuban Communist Party in order to live more <u>comfortably</u> . Married to a former medical-school student who <u>wishes</u> to leave Cuba and who constantly criticizes the political indoctrination in Cuban schools suffered by their four children. [redacted] admits corresponding with a brother in Miami. Age 35-40, 5' 7", 170 pounds, black hair. Would probably defect and be debriefed if abroad with family.
Dec 6, 1928	J.S.	YODU Prez. Reina. Assistant Professor [redacted] at the [redacted] Hospital. Admits he follows the dictates of the regime with commentary. Is sole member of [redacted] staff to side with the staff of the Department of Medical Psychology of the University of Havana, headed by <u>Jesse Angel Bustamante</u> , which is notoriously servile to the regime. Attended the 1960 international psychiatric congress in Mairida. Married and regularly fights in public with his wife. Mulatto, Age 35-40, 5' 11", 170 pounds, black hair. Name possibility of [redacted] if [redacted] felt there was absolutely no risk involved.
Se 4 F*	V.C.	Specially appointed Professor of Psychology of the [redacted] Hospital. Only intimate friends know that she is firmly anti-regime, as she pretends the opposite, in order to support her widowed mother and younger brother Philip, currently majoring in English literature at the University of Havana and attempting to obtain a scholarship for study abroad (probably England). [redacted] may have been born in the U.S., when her father was a Cuban diplomat posted there. She would leave Cuba if it were not for family commitments. She is a courageous, discreet woman, about 26 years old, who might possibly work against the regime while still in Cuba, and most probably would do so if she and her family were outside of Cuba. Would seek a scholarship to study abroad if there were a way to make up for the loss of her monthly income of approximately 500 pesos, which is needed for the support of her family.
Dec 6, 1940	F.M.	Instructor of Psychiatry, University of [redacted] Hospital. Admits he desires to leave Cuba but is too gripped by inertia or fear to try. His [redacted] wife also wishes to leave. 129 SOCIAL PSYCHOLOGY: A STUDY ON ITS LIMITS
AND BASIC CONCEPTS (*)

By Dr. Leopoldo E. Araujo Bernal (*)

(*) Professor of Medical Psychology, School of Medical Services of the University of Havana. Director of the Department of Social Psychology of the Institute of Advanced Nervous Activity.

137 ELECTROCARDIOGRAPHICAL ALTERATIONS IN THE
TRANSVENTRICULAR MITRAL COMMISSUROTOMYBy Dr. A. Hernandez Canero (*), Dr. M. Roedo Mon (**)
and Dr. J. Castillo Navarro (**)

(*) Professor of Internal Medicine, Head of the Cardiology Department of the Comandante Manuel Fajardo Training Hospital.

(**) Assistant Specialists, Department of Cardiology of the Comandante Manuel Fajardo Training Hospital.

142 CONCLUSIONS

1. The electrocardiograms corresponding to 33 cases of mitral stenosis operated transventricularly were studied.

2. The rhythm variations, as well as the favorable changes in the auricular and ventricular complex are those which, according to other authors, are present in patients operated transauricularly.

3. Many instances of pericardic injury were observed immediately after the operation. This injury is similar to that observed in patients throughout the article.

4. We were able to observe a fast deviation of the QRS axis towards the left, accompanied by signs of left ventricular hypertrophy, which shows severe mitral insufficiency.

5. The possibility of myocardial infarction following the trans-ventricular mitral dilatation is mentioned.

CHRONIC OBSTRUCTIVE EMPHYSEMA (*)
PSYCHOPATHOLOGY

By Dr. Alberto Orlandini N. (**)

(*) Presented before the First Regional Congress on Stomatology of Southern Oriente, on 29 October 1964.

(**) Resident of the Psychiatric Service, Provincial Training Hospital of Santiago de Cuba.

167

SUMMARY

The chronic obstructive emphysema with breathing insufficiency of the fourth degree originates first delirium, and then catatonic stupor. The psychic disturbances following the changes of consciousness are described.

168

CARDIOVASCULAR ASPECTS OF SICKLECELLIA (*)

By Dr. Jose Cabrera Flores(**) and
Dr. Hugo Camargo Gallegos(**)

(*) Presented before the First Regional Congress on Stomatology of Southern Oriente. Santiago de Cuba, October 1964.

(**) Dr. Enrique Cabrera Cosio Cardiovascular Department. Provincial Hospital of Santiago de Cuba.

169

CONCLUSIONS

After studying eight patients with Sicklecellia, the most important observation has been the enlargement of the electric systole shown by the electrocardiograms. This is to be confirmed in subsequent studies. Other observations are the presence of the Moglobin syndrome in the two cases presenting the lowest hemoglobin level, the evolution with normal cardiac rhythm in most cases. This phenomenon is present in the evolution of chronic anemic syndromes and has not been fully explained yet.
